PROFESSIONAL SUMMARY

Results-driven IT professional with 2+ years of experience in Product Operations, Project Management, and Quality Assurance within cross-functional product teams (PM, Designer, Engineer, QA). Proven ability to build and optimize end-to-end product workflows — from discovery to delivery, release, and post-launch monitoring — while maintaining structured documentation (Manual book, test documentation) that improved training efficiency by 90%. Experienced in Agile environments, stakeholder alignment across Product, Engineering, Operations, and Business teams, and managing competing priorities across 5+ concurrent products and enterprise clients. Holds a B.Sc. in Informatics Engineering with strong analytical, process improvement, and cross-functional communication skills.

WORK EXPERIENCE

Quality Assurance · Stamps

May 2025 – Present

- Collaborated closely with Product Managers, Designers, and Engineers in an Agile/Scrum environment to ensure product quality across functional, regression, and exploratory testing — identifying 100+ high-severity bugs and accelerating root cause analysis by 50%.
- Served as a key bridge between QA and Engineering teams by participating in daily standups and delivering real-time feedback, reducing bug resolution cycle time by 30% and enabling more predictable release schedules.
- Co-developed structured test case documentation and testing playbooks with the team, establishing repeatable QA workflows that minimized production-level defects and supported consistent deployment quality.
- Contributed to post-release monitoring by tracking product performance and flagging regression issues, enabling fast response to production incidents.

IT Project Operations · Stamps

Sep 2023 – May 2025

- Owned end-to-end operational workflows across 5+ products — from feature validation and milestone tracking to client delivery — ensuring stable, on-time deployments through structured quality checkpoints.
- Built and maintained 5+ comprehensive product documentation systems (user guides, release notes), improving client onboarding and internal training efficiency by 90%.
- Supported Project Manager in release tracking and milestone validation within Agile delivery cycles, proactively identifying risks and coordinating cross-functional alignment between Product, Engineering, and Operations teams.
- Managed multi-stakeholder relationships and delivered end-user training to enterprise clients including Marugame Udon, Richeese Factory (Indonesia & Malaysia), Burger King (Indonesia & India), and Popeyes — aligning product adoption with business goals.
- Acted as second-line tester across 5+ products, validating feature readiness against acceptance criteria before client delivery, ensuring consistent product quality standards.

Freelance Quality Assurance · Tumbuh Financial Technology

Jun 2023 – Dec 2023

- Identified and documented 400+ bugs across financial application modules through systematic UI, functional, and usability testing — building a structured bug-tracking workflow to prioritize fixes by severity and business impact.
- Implemented basic test automation using Selenium IDE, reducing manual regression testing effort and laying groundwork for scalable QA processes.

Intern IT System Analyst · JakLingko

Aug 2022 – Dec 2022

- Monitored system performance continuously using Elastic Stack, maintaining 99.9% uptime and generating actionable alerts for operational issues.
- Developed 5+ interactive data dashboards in Google Data Studio to support data-driven decision-making for operations and management stakeholders.
- Supported 100% of technical operational activities, ensuring smooth daily system operations and contributing to incident response documentation.

PROJECTS

Product Manager · [Daftrix & Digiscore — Pencak Silat Scoring System](#) Jan 2023 – Present

- Led end-to-end product development lifecycle, prioritizing and managing a backlog of 20+ features across multiple sprint cycles while ensuring alignment with UI/UX standards.
- Produced client-facing documentation including cooperation agreements and system training guides, facilitating smooth product adoption and stakeholder buy-in.

EDUCATION

B.Sc. Informatics Engineering · [Universitas Ahmad Dahlan](#) 2019 – 2023

GPA: 3.41/4.00 | Thesis: Web-based Sales Officer Performance Monitoring System for Telkomsel Balikpapan.

Cybersecurity Bootcamp · [Dibimbing.id](#) Jul 2025 – Jan 2026

Average Score: 93.11 | Focus: Network security, ethical hacking, penetration testing. Tools: Linux, Wireshark, Nmap, Burpsuite, Metasploit.

SKILLS

Process & Ops	Workflow design (discovery → delivery → release → monitoring), SOP & manualbook authoring, product documentation systems, release tracking, milestone validation
Tools	Git/GitHub, Notion, Postman, Katalon, Playwright, Selenium IDE, Google Data Studio, WordPress
API & Data	API testing (Postman, Swagger), basic data querying, dashboard reading, performance metrics interpretation, actionable reporting
Testing & QA	Functional, regression, exploratory, UI & usability testing; test case design
Security Tools	Burpsuite, OWASP ZAP, Nmap, Wireshark, Metasploit
Dev & Infra	JavaScript, Python, Linux, Database Design
Soft Skills	Structured & detail-oriented, problem-solving, stakeholder management, cross-functional communication, proactive ownership, comfortable in ambiguous fast-paced environments
Languages	Bahasa Indonesia (Native), English (B1 Intermediate — EF SET)
